Christian Hernandez

Full-stack design engineer who takes ambiguous operational problems and ships working software. 3 years as the sole designer and developer at a commercial real estate due diligence firm, owning every phase from stakeholder discovery through production deployment. Comfortable jumping between customer problems, architecture decisions, and code.

EXPERIENCE

Forward Deployed Engineer / Solutions Architect
@ National Due Diligence Services

August 2024- October 2026

- Built end-to-end automation tools from rough stakeholder ideas, owning frontend, backend, and deployment across all projects
- Worked directly with CEO and department heads to translate ambiguous operational problems into production software
- Replaced a manual document processing workflow handling 6,400+ files monthly — a task leadership considered offshoring — with an AI-powered batch pipeline, saving ~100 hours/month
- Shipped a full-stack zoning compliance SaaS replacing 20+ page Word templates, achieving 100% team adoption and saving 20 min/report
- Used Claude Code, Cursor, and LLM integrations as a primary part of the development workflow

Ux Ui Design Ai specialist + supervisor
@ Ambitus

March 2026- July 2026

- Supervised and quality checked 100+ employees on a short term basis for a UX UI ai data training project.
- Reviewed the quality of junior designers ui output and provided constructive feedback to improve designs.
- Curated ux related ai data training tasks.
- Graded ai output quality to improve outputs.
- Create product mockups and interface designs based on defined scenarios
- Develop user flows and interaction models to represent product experiences
- Refine design solutions based on feedback and project criteria

SKILLS
